PROFESSIONAL EXPERIENCE

DETROIT ST. PHILLIP'S CHILDREN'S HOSPITAL, DETROIT, MI, 2002-Present
Registered Nurse, Endocrine, Neuroscience, Med-Surgical Inpatient Unit

Meet the organization's high quality standards while caring for patients with acute and chronic medical conditions, including seizures, asthma, diabetes, and cystic fibrosis in this 40-bed pediatric unit. Employ strong clinical skills in the care of general surgery, neurosurgical, and psychiatric patients. Adhere to HIPAA requirements and maintain accuracy in charting patients' condition, medications, and treatment using the department's electronic medical record system.

- ▶ Apply clinical judgment in monitoring patients' progress, providing prescribed treatments, and administering medications.
- ▶ Work in collaboration with a high-performing interdisciplinary team of medical and healthcare professionals, including physicians, nurses, dietitians, social workers, case managers, and physical therapists in providing safe and effective patient care.
- ▶ Educate patients and family members on treatment options and methods, disease processes, medical-surgical procedures, medications, and wellness.
- ▶ Serve on the Wound Care Committee; involved in conducting a monthly wound audit on the acute care unit, educating staff nurses on the prevention of hospital-acquired skin breakdown, and responding to wound care questions posed by staff nurses.

CLINICAL ROTATIONS

DETROIT ST. PHILLIP'S CHILDREN'S HOSPITAL, DETROIT, MI Pediatric Acute Care, Pediatric Neurosurgery, 180 Clinical Hours

Practiced alongside a clinical preceptor in caring for and managing patients with neurological diseases.

- ▶ Engaged in ordering, performing, and interpreting patients' diagnostic and therapeutic tests and procedures.
- ▶ Involved in sensitive family discussions related to the diagnosis and treatment of patients. Provided support and guidance through the decision-making process.

Emergency Department, 225 Clinical Hours

Obtained patient histories and performed advanced physical assessments on up to 20 patients per day in collaboration with a clinical preceptor. Adhered to quality standards in providing care to infants, children, and adolescents with complex medical needs. Partnered with other specialties to ensure delivery of comprehensive care.

- ▶ Addressed anticipatory guidance, health education, and preventative services with patients and their families.
- ▶ Counseled, educated, and guided patients and families on medical problems, psychological problems, use of prescribed treatments, medications, and preventative care.
- ▶ Taught patients and families in the areas of disease management, medication adherence, and preventative care.

Pediatric Infectious Disease Unit, 23 Clinical Hours

Worked along with the infectious disease physician in diagnosing, providing care, and treating patients with a wide range of infectious diseases. Partnered with a clinical preceptor to identify and record patients' treatment, progress, and changed orders as appropriate.

- ▶ Employed strong clinical decision-making skills in formulating diagnosis and treatment plans.
- ▶ Conducted physical assessments and recorded comprehensive patient histories; adhered to hospital standards and HIPAA requirements in using the electronic medical records application.
